

## Art Workshop Day

Art workshop has been designed to provide opportunities to extend the skills of those who have been identified with artistic talent. Although it is not limited to this as we encourage people who have a joy of art to experience the studio environment. Participants will be in the studio using quality artist's mediums in the development of art works. They will experience a variety of techniques and stimulus in the creative space that Aberdoon House offers. The program is designed to encourage individualised support, to encourage the unique talents within each participant. This activity gives opportunity to showcase art in exhibition and increase participation through exposure to the work of others within the broader community.
